

# Silicone Strap Replacement Instructions

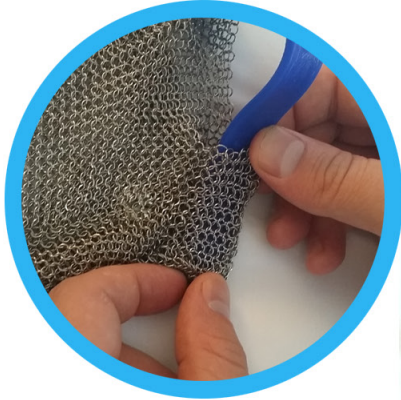

FOR 1205<sub>SB</sub> METAL MESH GLOVES

## REMOVING THE STRAP

Removing the strap is a straight forward process. Follow these helpful instructions for easy removal.

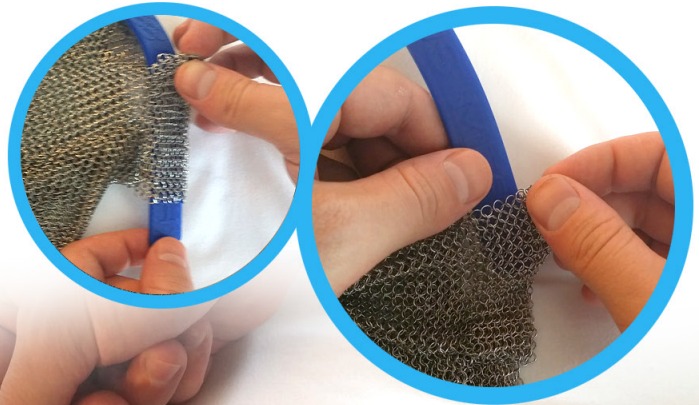

### Step 1

Holding the mesh cuff, gently start pulling the silicone strap out of the cuff.

### Step 2

Continue pulling the strap until the strap is completely removed from the metal cuff.

Well Done. Now that the strap is removed, we can now move onto inserting the new strap.

## INSERTING THE NEW STRAP

### Step 3

Now reverse the process, thread the new silicone strap through the metal mesh cuff.

### Step 4

Finish pulling the strap through the last loop of the metal mesh glove.

### Step 5

Straighten the strap out to insure that the strap is completely pulled through the loop.

The finished metal mesh glove with a new silicone strap.
