

Silicone Strap Replacement Instructions

FOR 1205_{SS} METAL MESH GLOVES

REMOVING THE STRAP

Removing the strap is a straight forward process. Follow these helpful instructions for easy removal.

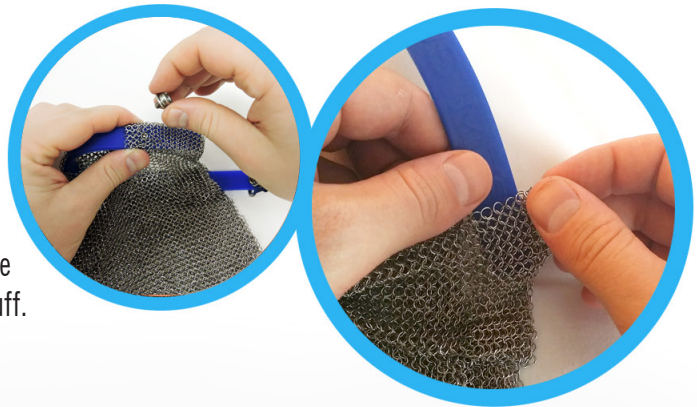

Step 1

Using a philips head screw driver, remove the set screw from the strap.

Step 2

Holding the mesh cuff, gently start pulling the silicone strap out of the cuff.

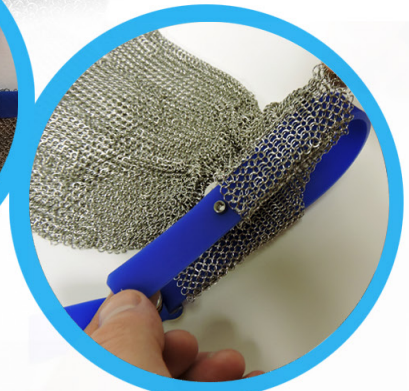

Well Done. Now that the strap is removed, we can now move onto inserting the new strap.

INSERTING THE NEW STRAP

Step 3

Now reverse the process, thread the new silicone strap through the metal mesh cuff.

Step 4

Finish pulling the strap through the last loop of the metal mesh glove.

Step 5

Straighten the strap out to insure that the strap is completely pulled through the loop. Using the philips screw driver, tighten the set screw.

The finished metal mesh glove with a new silicone strap.
